

# Space: The Fridge

(my fav)

# Intended Uses

- store food and keep it fresh
- chill food for temporary amounts of time - like jello!
- make ice
- freeze food
- receive and purify water

# Alternative Uses

- medical purposes: freezing or chilling a cold compress
- “wash” your clothes: freezing your clothes in a zip lock bag to kill all the bacteria
- stretch out your shoes: pouring water into plastic bags and putting them into the shoes and letting them sit in the freezer

# Space Activation

- I activate the space for most of the functions: opening the door, performing actions with the food, using a cup to get water, retrieving ice
- But - the objects in space also perform functions without me: example - food rotting
